Description

AB 116 was created following the idea to navigate at high speed with any sea condition without living up the comfort standards that are part of the DNA of all AB Yacht Jewels. The incredible mixture of technology and hydrodynamic merge in the performances of AB 116: 42 knots of maximum speed and 36 knots of cruising speed, obtained in a soft environment, completely isolated from the exterior. The three engines MTU of 2400hp each, accurately coupled to three water-jets, allow a modular usage of propulsion.

Like all AB Yacht masterpieces, AB 116 is completely custom, from division into compartments to exteriors where you can see all your wishes completely satisfied. A further ingredient that astonishes on AB 116 is the enormous Flying bridge equipped with all the imaginable refinement, as well as two garages, one on the stern and one on the bow, that allow to contain two tenders and two jet skis, to satisfy also the most demanding clients.

Hight performance yacht built using the most advanced technology.

Five guest cabins, generous exteriors spaces, ample storage.

RINA and Class renewed in 2019. Inspection of the jets, valves, water intakes, etc.

New upholstery of the external cushions and hull painting of the same color.

Many accessories on board, full list available on request!
