

DESCRIPTION

The new RH 1000 replays in an exhilarating way to the most demanding expectations of performance and safety, maintaining a complete series of responses on deck for those who love sailing as well as for those who adore relaxing at anchor with its comforts.

Simple to manage for the less experienced, adrenaline-filled for the more reckless. Her design, in the name of simplicity, makes her easy to manage during and after use. The choice to use a few types of materials on the deck makes her elegant and functional as only a Novamarine can be.

This 10 meter inflatable boat is made up of a comfortable V-shaped bow dinette with a central cushion that transforms it into a large sunbathing area, two opposing sofas placed on the stern floor and a central wheelhouse with a triple ergonomic seats that benefits from very careful ergonomics resulting in total control of the rib at any speed.

To complete, the soft top with a black steel structure and a very effective windshield to protect from the air even at the fastest speeds.

With two 300 hp Mercury V6 engines we can reach an extraordinary top speed that exceeds 50 knots.

Even with an extreme handling, there is no lack of a great feeling of safety that this rib is able to offer. The hull is very balanced and to feel her limits you really have to exaggerate.
