

DESCRIPTION

The Ferretti 592 carries with it the prestige and elegance that have characterised her illustrious predecessors, the Ferretti 590 and 591, with more contemporary and brighter finishes. Her streamlined profile and large open-view windows, undisputed icons of the Ferretti brand, blend seamlessly with the abundant interior space, creating an environment that conveys a sense of well-being and comfort.

The large windows allow every corner of the living area to be flooded with natural light, transforming the space into a charming and airy atmosphere. The reorganisation of the kitchen towards the stern leads to an intelligent use of space and creates a welcoming social area. The generous tilting window enables a harmonious connection between the cockpit, galley, and living area, ideal for spending unforgettable moments with friends. The combination of wood and light-coloured fabrics on the sofas gives the environment an unmatched sense of brightness and spaciousness. The raised helm station ensures unparalleled panoramic views while navigating. To facilitate access to the flying bridge, a well-designed staircase allows for easy passage from the cockpit. The exterior layout is designed to enhance the experience of the sea and sun. On the flying bridge, there is a spacious sunbathing area and a living space with a comfortable U-shaped sofa available for all guests, accompanied by a convenient wet bar for unforgettable moments.

Below deck, the Ferretti 592 distinguishes herself further. The spacious and bright master cabin features a chaise longue, offering a relaxation experience comparable to that of a suite on a larger yacht. Characterised by large open-view windows, opening portholes, and a private bathroom with a separate shower, it frames a luxury and functional environment.

Completing the lower deck are two well-appointed cabins, a forward VIP double cabin and a guest cabin with twin beds, both equipped with private bathrooms to ensure maximum privacy and comfort. The possibility of having two spacious double cabins on a yacht of less than 60 feet is a highly appreciated advantage by boaters, highlighting the value of Ferretti Yachts' design choices.

Finally, with the power of two MAN engines with 1100 horsepower each, the Ferretti 592 does not disappoint in performance, reaching a cruising speed of 28 knots and a maximum speed of 32 knots, making her an ideal companion for navigating in total comfort and luxury.
