

DESCRIPTION

The Ferretti 681 is an impressive 21-meter flying bridge yacht, showcasing the collaboration between Studio Zuccon International Project and Ferretti Group's Engineering Division. Designed for space efficiency, she features a spacious cockpit with a folding bench and teak table for up to 8 guests, connecting smoothly to a luxurious lounge and crew quarters through a sliding door.

Inside, the lounge boasts a fresh, contemporary design with rich wood finishes, a living area with an L-shaped sofa, and entertainment facilities. A well-designed helm station streamlines navigation, while the dinette provides an L-shaped leather sofa and seating for dining. The galley is conveniently located adjacent to the dining area and discreetly accessible to the crew.

Below deck, two guest cabins with twin beds and a shared toilet offer comfort, while the VIP cabin features a luxurious double bed, closet space, and an en-suite bathroom. The full beam owner's cabin is elegantly designed with a double bed, a semicircular sofa with large windows, ample storage, and a stylish en-suite.

Crew accommodations consist of two cabins for the captain and crew.

On the flybridge, guests can enjoy a dining area, sun lounges, and a helmsman's station with a sofa, fridge, and grill for outdoor dining, as well as space for a tender.

This boat is powered by dual MAN 1360 hp engines, achieving cruising speeds of 26 knots and a top speed of 34 knots, merging luxury with high performance.

She is in turn key condition and has been meticulously maintained by her dedicated crew, spending only four months in the water and the rest of the year in a shed.
