

AZIMUT 78 FLYBRIDGE (2024) I D E A YACHTING

DESCRIPTION

The Azimut Fly 78 is a groundbreaking luxury yacht that seamlessly blends cutting-edge design, advanced engineering, and exquisite craftsmanship to redefine the yachting experience. Its exterior, envisioned by Alberto Mancini, features sculptural, fluid lines that evoke a sense of continuous motion, transforming traditional aesthetics into a dynamic, living sculpture that harmonizes with the sea and sky. Internally, architect Achille Salvagni crafts a sophisticated, harmonious environment with soft contours, suspended furniture, and subtle color accents, creating a private, functional space where the owner's suite serves as a luxurious personal retreat.

Designed for social connection and outdoor enjoyment, the Fly 78 boasts a thoughtfully arranged layout with a bow lounge for intimate conversations and a versatile flybridge comprising sunbathing areas, a sheltered bar and dinette, and expansive cushions for relaxation and panoramic views. The outdoor decks facilitate effortless dining, sunbathing, and social gatherings amid nature's beauty.

Performance and environmental innovation are at the core of the Fly 78. Its triple Pod propulsion system offers enhanced manoeuvrability and space efficiency, enabling additional guest cabins and ensuring operational discretion with side service doors. The use of Azimut's Carbon Tech Generation—carbon fiber reinforcement—reduces weight, enhances stability, and diminishes fuel consumption and CO₂ emissions by 20–30%, reflecting a strong commitment to sustainability without sacrificing luxury or performance. Overall, the Azimut Fly 78 embodies a harmonious fusion of avant-garde design, technological innovation, and eco-consciousness, establishing a new benchmark in luxury yachting.
