

CHILI NINE

SUNSEEKER MANHATTAN 73 (2012)

I D E A
YACHTING

DESCRIPTION

The Sunseeker Manhattan 73 is exceptionally well equipped and offers remarkable interior volume for a yacht of over 22 meters. Powered by twin new generation MAN 1550 HP engines, she reaches speeds of up to 30 knots while delivering efficient long-range cruising at around 10 knots. A shipyard-installed stabilization system enhances onboard comfort both underway and at anchor.

Equipped with a cutting-edge 20kW lithium battery system, the yacht can power all onboard systems — including the stabilizers — without running the generators, allowing for multiple days of silent, vibration-free living at anchor. A level of autonomy and technology typically found only on high-end, custom-built yachts.

The interior showcases outstanding craftsmanship, featuring satin walnut finishes, luxurious new upholstery, and a state-of-the-art entertainment system. The spacious main saloon combines living and dining areas designed for owner comfort, complemented by panoramic windows and a generous cockpit. Above, the expansive sun deck features a hard top with an electric sunroof and removable clear enclosures, allowing enjoyment in all weather conditions. Open the roof for evenings under the stars or close it for shelter — without the hassle of traditional covers. The sun deck also includes a built-in TV, full wet bar with refrigerator, ice maker and grill, and a Jacuzzi spa — ideal for family enjoyment and extended cruising. Accommodation for up to 10 guests includes a full-beam master suite, forward VIP cabin, twin cabins to port and starboard, plus aft crew quarters that can serve as additional guest accommodation.
