

DESCRIPTION

The 2024 Novamarine Black Shiver 120 FB combines Novamarine's distinctive military-inspired DNA with exceptional performance, stability and generous open-air spaces. At 12.14 metres, the BS 120 is designed around a deep-V hull offering confident handling and a highly engaging experience at sea, while its versatile deck layout provides extensive areas for cruising, entertaining and relaxation.

This example is equipped with triple Mercury Verado V10 400 HP outboard engines, delivering a total of 1,200 HP, with only 25 hours of use. Practically new, she represents an opportunity to acquire a highly specified Black Shiver with the benefit of numerous optional features and equipment already installed on board.

The spacious deck offers multiple configurations for seating and sunbathing, complemented by direct and comfortable access to the water through a pair of side doors with teak trim, complete with integrated swim ladders and pull-out showers. Her combination of powerful triple-outboard propulsion, robust construction and sophisticated onboard equipment makes her equally suited to fast day cruising, watersports and extended time at sea.

A rare opportunity to acquire a virtually new Black Shiver 120, extensively equipped and ready to enjoy.
