

## DESCRIPTION

The Princess 420 Fly is a highly regarded motor yacht, renowned for her exceptional sea-keeping, efficient performance and timeless British design. Her deep-V Olesinski hull and semi-tunnelled propellers provide remarkable stability, smoothness and impressive planing performance, even at lower speeds. A pioneering model in her class, she was among the first yachts of this size to feature an integrated GRP flybridge staircase, a design element subsequently adopted by numerous shipyards.

Powered by upgraded twin Caterpillar 425 HP engines, she offers a declared maximum speed of 33 knots and a cruising speed of approximately 27 knots. Her engine specification provides an excellent balance between performance and fuel-efficient cruising. She is further equipped with a bow thruster and hydraulic gangway, ensuring excellent manoeuvrability and practicality.

The interior accommodates up to four guests in two cabins, comprising one double and one twin cabin.

This example has had only two owners, with the current owner having carefully maintained her since 2003. The engines have benefited from annual servicing, even during periods of limited use.

A well-maintained and extensively upgraded Princess 420, offering a proven combination of performance, comfort and reliability.
