ARKELON

ROSSATO NAVETTA 19 (1992)

DESCRIPTION

ARKELON is a distinctive 20-metre displacement motor yacht, designed by Studio Starkel and built by Rossato Shipyard in Venice, with construction commencing in 1992 and completion by Mondomarine in Genoa in 1994, when she was first registered.
Conceived for comfortable cruising, her compact dimensions offer practical advantages, including easier manoeuvring and berthing, reduced maintenance requirements and excellent onboard liveability. Her layout accommodates guests in three cabins, each with its own ensuite bathroom, complemented by a spacious and welcoming saloon.
Throughout her life, she has benefited from significant investments and technical upgrades. In 2021/2022, she underwent an extensive refit, including a complete Awlgrip repaint with a full paint system, inspection and overhaul of onboard systems where required, new shaft bearings and a new teak cap rail.
In 2023, the entire engine room was dismantled and comprehensively refurbished. Further improvements followed in 2024, including the replacement of all three helm stations with electronic controls.
ARKELON combines classic Italian naval design, practical displacement cruising characteristics and substantial recent technical works, offering a unique opportunity for an owner seeking a comfortable and capable yacht with a distinctive history.
